The Natural Capital Coalition is an open and inclusive collaborative space, created by and including, businesses, governments, finance, science and academia, associations, finance and standard setters.

By joining, you are agreeing to collaborate with others who have a common vision of a world where we conserve and enhance natural capital, and who are transforming the way we make decisions.

Benefits

Collaboration

Collaboration is central to the Coalition. You will have the opportunity to regularly engage through various online and in person activities with the wide network of leading natural capital organizations and experts. With support from the Coalition team you will be able to identify the partners and initiatives that are right for you, develop or take part in collaborative projects, and offer your experience to help other Coalition organisations to achieve their aims.

Communication

You will receive the latest curated thinking and practice on natural capital through the Natural Capital Hub, newsletter and program of online and live events. With preferred access to networks, platforms and events around the world you will be able to develop a greater understanding of natural capital activity, the benefits this can provide, and how it relates to other initiatives.

Recognition

Coalition organizations are recognized as leaders. You will have the opportunity to share your experience and work both within the community and beyond in sector, national, and international forums.

Requirements to become a Coalition Organization

Participation is open to any organization (not individual) who:

1. Subscribes to the Coalition's vision of a world that conserves and enhances natural capital.
2. Can define how it would collaboratively contribute to activities that support natural capital thinking.
3. Does not wish to compete with, or subvert, the work of the Coalition.

The Coalition Board can remove an organization if they act to jeopardize the work of the Coalition, or our shared vision¹.

¹ Becoming a Coalition Organization demonstrates support for the work of the Coalition; however, this does not mean the Coalition accredits Coalition Organizations' work on natural capital.
